PROFILE

Informatics graduate from Gunadarma University with hands-on experience in **Data Analytics, Data Science, Data Engineering, and Machine Learning** through academic and collaborative projects. Experienced in data preprocessing, exploratory data analysis, data visualization, machine learning model development, and database management. Also experienced in developing and implementing technology-based solutions, with strong analytical thinking, problem-solving, and teamwork skills. Seeking opportunities to apply data-driven approaches to transform data into meaningful insights and practical solutions for real-world problems.

EDUCATION LEVEL

Undergraduate Informatics, Gunadarma University ***Sept 2022 - Aug 2026***
- GPA: 3.93/4.00

React & Back-End with AI Cohort, Asah Ied by Dicoding ***Aug 2025 - Jan 2026***
- Final Score: 92.3/100

Machine Learning Engineer Cohort, Coding Camp Powered by DBS Foundation ***Feb 2025 - Jul 2025***
- Final Score: 90.9/100

JOB EXPERIENCE

Web Developer Intern
Badan Nasional Pencarian dan Pertolongan (BASARNAS) ***Jan 2026 - Mar 2026***
- Contributed to the development of an internal web-based system for meeting scheduling and coordination to support the agency's operational activities.
- Designed and implemented user interfaces and front-end features using **React.js** based on user requirements, focusing on usability, consistency, and user experience.
- Conducted functional testing and quality checks to identify and resolve interface and feature issues, ensuring the system functioned according to the requirements.

PROJECT EXPERIENCE

Front-End Developer ***Aug 2025 - Jan 2026***
Capstone Project | Asah Ied by Dicoding
- Collaborated with Machine Learning and Back-End teams to develop an AI-powered predictive maintenance copilot platform called **MaintEase**, integrating the front-end with system functionalities.
- Designed and developed responsive, user-friendly interfaces using **React.js**, including contributing to the implementation and integration of the **AI chatbot** feature.
- Contributed to feature refinement and successfully delivered the Minimum Viable Product (MVP) within the project timeline, achieving a final project score of **90/100**.

Machine Learning Engineer ***May 2025 - Jun 2025***
Capstone Project | Coding Camp Powered by DBS Foundation
- Developed a disease diagnosis website called **Diagnosmart** for early detection based on user-inputted symptoms, covering four medical categories: general illness, orthopedics, dermatology, and digestive disorders.
- Implemented an **CNN** model using **TensorFlow** to classify disease types based on collected symptom data.
- Achieved a final project score of **92/100**, evaluated based on system functionality, model accuracy, and user interface design.

SKILL & QUALIFICATIONS

Technical Skills: Python (Pandas, NumPy, Scikit-learn, Keras), SQL, Power BI, MySQL, PostgreSQL, Microsoft Office (Word, Excel, PowerPoint), Google Workspace (Sheets, Docs, Slides), and Git/Github.

Soft Skill: Communication, Team Collaboration, Adaptability, Analytical Thinking, Problem Solving, Attention to Detail, and Time Management.

Certifications: Associate Data Engineer LSP (2026), React & Back-End With AI on Asah Ied by Dicoding (2026), Associate Data Science BNSP (2025), Machine Learning Engineer Cohort on Coding Camp Powered by DBS Foundation (2025).
