PROFILE

Bachelor of Informatics graduate from Gunadarma University with hands-on experience in **data analytics** through academic and collaborative projects. Skilled in data cleaning, preprocessing, exploratory data analysis (EDA), data visualization, interactive dashboard development, and database management using **Python**, **SQL**, **Excel**, and **Power BI**. Able to identify patterns, transform data into actionable insights, and communicate data-driven findings to support informed decision-making. Additional background in machine learning and cross-functional collaboration with Back-End and Front-End developers. Seeking opportunities to apply data-driven approaches to practical solutions for real-world problems.

EDUCATION

Bachelor of Informatics, Gunadarma University ***Sept 2022 - Aug 2026***
- **GPA: 3.93/4.00**

React & Back-End with AI Cohort, Asah Ied by Dicoding ***Aug 2025 - Jan 2026***
- **Final Score: 92.3/100**
- **Courses:** Belajar Dasar Structured Query Language (SQL), Belajar Dasar AI, & Belajar Dasar Git dengan Github.

Machine Learning Engineer Cohort, Coding Camp Powered by DBS Foundation ***Feb 2025 - July 2025***
- **Final Score: 90.9/100**
- **Courses:** Belajar Analisis Data dengan Python, Belajar Analisis Data untuk Pemula, Belajar Fundamental Pemrosesan Data, Belajar Visualisasi Data, Belajar Dasar Data Science, & Belajar Machine Learning untuk Pemula.

JOB EXPERIENCE

Web Developer Intern
Badan Nasional Pencarian dan Pertolongan (BASARNAS) ***Jan 2026 - Mar 2026***
- Developed an internal web-based system for meeting scheduling and coordination to support the organizational units' operational activities .
- Designed and implemented user interfaces and front-end features using **React.js** based on user requirements, resulting in a more consistent and user-friendly system interface.
- Conducted functional testing and quality checks to identify and resolve interface and feature issues, ensuring the system functioned according to the requirements.

Assistant Instructor Mathematics
Kumon ***Oct 2026***
- Taught and supported approximately **50 students** in completing mathematics learning materials, helping maintain consistent learning progress.
- Reviewed and corrected students' assignments, analyzing common mistakes to provide targeted individual feedback and improve understanding.
- Monitored students' progress and identified those needing direct guidance, then helped them work through problems to keep their learning on track.

PROJECT EXPERIENCE

Superstore Sales Analysis
Personal Project
- Performed **data quality checks** on the Superstore dataset by reviewing data volume, missing values, duplicate records, and negative profit to ensure data quality.
- Deep-dive analysis sales performance, profitability, product, discount, and regional using **PivotTables**, identifying Technology as the leading category and Furniture as the lowest-profitability category, with Tables as the main contributor to Furniture's losses.
- Developed an interactive **Excel dashboard** with KPIs and charts, revealing that East had the largest Tables loss (-$11.0K).

Front-End Developer ***Aug 2025 - Jan 2026***
Capstone Project | Asah Ied by Dicoding
- Collaborated with Machine Learning and Back-End teams to develop an AI-powered predictive maintenance copilot platform called **MaintEase**, integrating the front-end with system functionalities.
- Designed and developed responsive, user-friendly interfaces using **React.js**, including contributing to the implementation and integration of the **AI chatbot** feature.
- Delivered the Minimum Viable Product (MVP) within the project timeline, achieving a final project score of **90/100**.

Machine Learning Engineer ***May 2025 - Jun 2025***
Capstone Project | Coding Camp Powered by DBS Foundation

- Developed a disease diagnosis website called **Diagnosmart** for early detection based on user-inputted symptoms, covering four medical categories: general illness, orthopedics, dermatology, and digestive disorders.
- Build a **Convolutional Neural Network (CNN)** model using **TensorFlow** to classify disease types based on collected symptom data, achieving more than **95% accuracy** on test data.
- Achieved a final project score of **92/100**, evaluated based on system functionality, model accuracy, and user interface design.

SKILL & QUALIFICATIONS

Technical Skills: Microsoft Office (Word, Excel, PowerPoint), Google Workspace (Sheets, Docs, Slides), Python (Pandas, NumPy, Scikit-learn, Keras), SQL, Power BI, MySQL, PostgreSQL, and Git/Github.

Soft Skill: Communication, Team Collaboration, Adaptability, Analytical Thinking, Problem Solving, Attention to Detail, and Time Management.

Certifications: Associate Data Engineer BNSP (2026), React & Back-End With AI on Asah Ied by Dicoding (2026), Associate Data Science BNSP (2025), Machine Learning Engineer Cohort on Coding Camp Powered by DBS Foundation (2025).
